## Solar Heat Europe welcomes Abora Solar as its new member

17. July 2020 / By Alexandra Sutu / In News For Members, Public / Tags Solar Thermal

2 ❤️

Solar Heat Europe is thrilled to welcome its new member Abora Solar, a company playing an important role in our sector, providing innovative solutions meant to bring us closer to the energy transition.

### About Abora Solar:

Abora Solar is the company that currently designs and manufactures the most efficient certified solar panel in the world, with an 87% efficiency. Based in Zaragoza, Spain, where they market their latest generation solar solutions to countries such as France, Switzerland, Iceland, Germany, Colombia, Greece or Portugal.

Thanks to the aHTech® technology developed by Abora, the energy market has been redirected, transforming it into a more profitable and sustainable model, which brings us closer to a necessary energy transition.
